Smart about Storage...

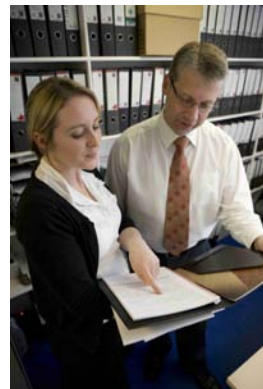

At Workplace by design we understand how storage should support your users and integrate into your interior. Whether you are expanding, downsizing or just want to improve the function, appearance or indeed safety of your offices we can help.

With unrivaled experience from within our group and via our extended supply chain we can analyse your current situation, identify areas for improvement and agree a programme for implementation that will save you Money, Time and Space.

The following pages identify a few of the innovative solutions that we might consider appropriate, along with rationalisation methods to move you towards a paperless environment.

Take advantage of our free initial consultation so we can assess the potential savings for you and explain further the process that has been used so successfully for companies of every type and size.

Call us on 01227 280028 or email us at info@workplacebydesign.co.uk

Monotrak – mobile system

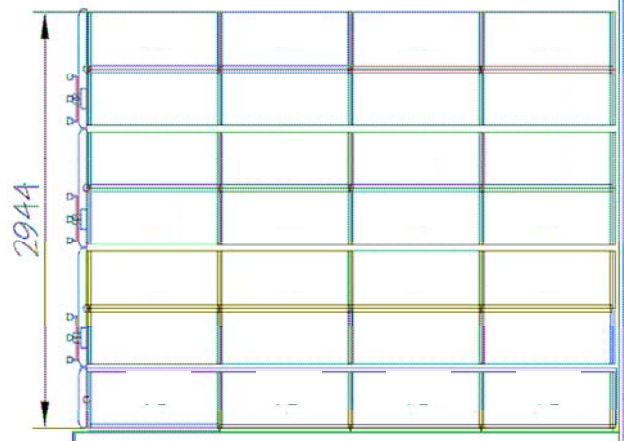

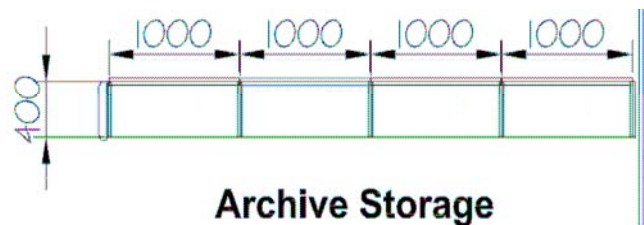

66 bays of 7 level Rackline mobile shelving will hold 462 linear metres on 35 sq m. of floor space. 3.5 times more capacity than traditional filing cabinets.

Monotrak is a unique mobile system, operating on a single guide track laid directly onto the existing floor.

Monotrak will double your storage capacity, is simple to operate and gives the added flexibility of simple relocation without residual damage.

Due to the way the system spreads the load, Monotrak can operate on a raised access floor without the need for reinforcement. A slim carriage profile and outstanding design enables loads of up to 2,500kg and 5 metres long to be moved with ease.

Mobile storage systems are designed to efficiently use expensive floor space and can increase storage capacity of existing areas by 80%.

Rotary – fast access rotary storage centre

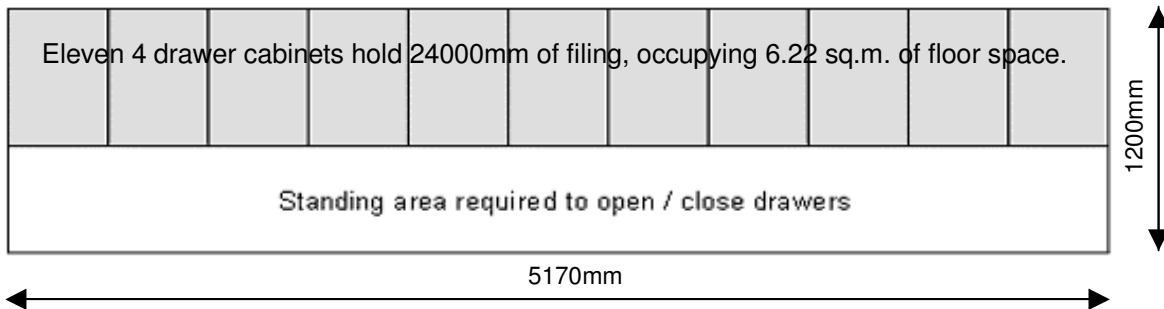

Pirouette is a high density and fast retrieval rotary filing system system with double sided cabinets mounted on a heavy duty rotary base.

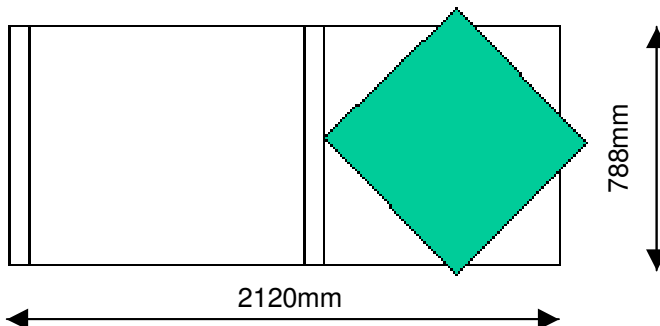

A 90 degree turn provides access to either shelf face without the operator moving from the spot.

More efficient than conventional filing cabinets, **Pirouette** rotary filing system delivers open access filing, quickly, reducing retrieval times by up to 50%.

Pirouette integrates very well with the commercial environment.

Two Pirouette storage systems, each of eight levels, hold 24320mm of filing in only 1.67sq.m. of floor space - a massive saving of 73%

Rotary – fast access rotary storage centre

Technical Information

Unit type	Unit width	Unit depth	Unit height	Storage capacity
Initial	1145mm	790mm	8 level:2385mm	12160mm of filing
Expansion	985mm	790mm	7 level:2110mm	10640mm of filing
			6 level:1835mm	9120mm of filing
			5 level:1560mm	7600mm of filing
			4 level:1285mm	6080mm of filing

Units must be positioned 180mm from rear walls.

Filestation – utilise your space

Filestation is designed to directly replace lateral filers in a modern office environment. It enjoys the high density storage that is offered by mobile systems and so for example, can offer a 50% increase in filing space when compared to a typical layout of four lateral filers against two desks. The patented Monotrak design also means that Filestation sits directly onto any floor surface with no need for an infill floor, thus negating any trip hazards that other mobile systems cannot avoid.

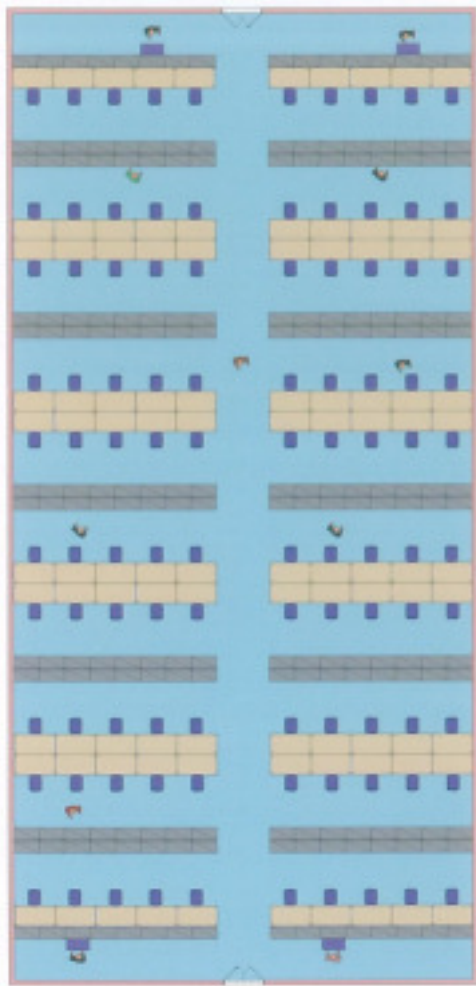

Filestation cuts retrieval times by 40% compared to traditional solutions which can mean dramatic savings in costs in large office environments. In addition, in environments where space is at a premium, the installation of Filestation potentially means that more desk spaces can be freed up for fee earners in busy environments.

Filestation can free up to two desks spaces for every six lateral filers it either replaces or substitutes.

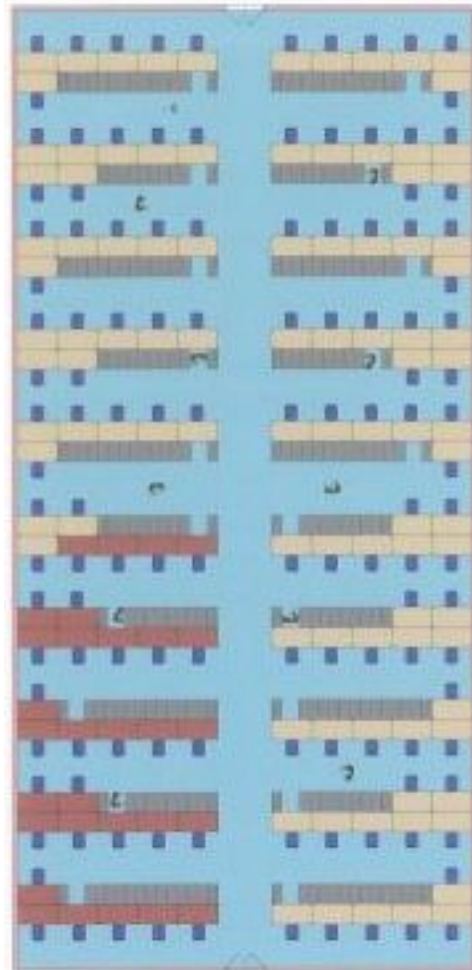

Filestation – utilise your space

Standard office layout

100 No. workstations
192 No. 3 high cabinets at 1000mm wide
= 518 linear metres

Standard office layout with Filestation

130 No. workstations
240 No. bays of Filestation at 800mm wide
= 522 linear metres
Providing 30 No. additional workstations

By incorporating Filestation into the above office footprint an additional 30 workstations would be provided and 240 bays of Filestation or 522 linear metres. This gives a 30% increase or a saving of 224m² of floorspace, resulting in savings of over £100k per annum based on typical UK rental costs.

Meridian – versatile filing and storage

Meridian filing and storage leads the field in design, construction and versatility. It's the perfect choice for group spaces that are accessible to everyone, where high-density storage is situated.

What's special about Meridian?

Modular

The key to Meridian's unique performance is its modular design. Meridian is composed of individual modules, which can be stacked to virtually any height to fit functional, space and aesthetic requirements. To accommodate changing needs, a module can be easily rearranged by an installer, in under 10 minutes. Modules can be un-stacked, reconfigured, reversed, added to, or taken away.

Premium quality

Premium quality is engineered into every Meridian product. The solid steel, full-frame construction of each module keeps files rigid. Double-wall drawers with inner fronts are tough and durable. To ensure safety, a positive interlock system allows only one drawer to be opened at a time. The rich aesthetics of all Meridian products add elegance and colour to any environment.

Architectural

The Meridian product line has a distinctive, architectural look. This helps delineate space and create boundaries, working well with architectural features. It can be used to divide space, mark corridors and define team areas.

Sustainable design

Meridian is a sustainable design that is manufactured to be earth-friendly. Cases are made of 100% recyclable steel. Powder-coat finishing is used for all metal parts and only water-based stains are used. Herman Miller purchases all woods from sustainable supplies.

Meridian – versatile filing and storage

Internals for drawers and flipper units

- Front to back file rails
- Side to side file rails
- Drawer dividers (tall and short)
- Magnetic divider for flipper doors
- Label holders
- Individual locks
- Security pan
- Counterweight

Internals for hinged door units

- Shelf (20mm) with undershelf filing
- Magnetic divider
- Coat rail (full width)

Pass through unit

Available in 335mm height in widths of 800,900 and 1150mm

Towers

Workstation Towers from Herman Miller offer an innovative approach to personal storage. They provide the user with up to three times the secure personal storage in the same footprint as a standard pedestal, and the opportunity to personalise their workspace whilst adhering to corporate clean desk policies.

Features

Towers are available in two forms and various configurations:

Pull-out towers are either 1100 or 1300mm high, left or right hand configuration:

- 1100mm high provides an ancillary worktop (h720mm), a fabric pinboard, an accessory rail and two rows of landscape filing.
- 1300mm high provides either 4 levels of landscape filing or three levels of portrait binder filing.

Storage towers have a 2 or 3 drawer pedestal base unit with a choice of handle detail, and a top section that stores A4 lever arch binders that can be open or with a tambour door closure.

All types of Tower are designed to accommodate A4 box files, binders and lateral file pockets.

Shelves are adjustable in 17mm height increments to accommodate the maximum range of media.

Towers are available with a choice of worktop in steel, melamine or veneer in a selection of finishes to match the surrounding furniture.

Towers carry a 10-year Herman Miller guarantee.

Towers have been tested against the relevant sections of BS 4875 and BS 5459.

Storage wall

Partnering with a British manufacturer we offer storage wall available up to 2700mm height with standard 500mm width and 1000mm width's it becomes very cost effective. A wide variety of internals including filing frames and shelves accommodates the majority of filing media without the need to change filing methods.

Finished in MFC it's very durable and offers a good range of standard colourways. Doors have soft close closing hinges and a very simple locking system allows doors to open independently and avoids the need for shoot bolts

The system is totally demountable therefore easily moveable and is used to clad core walls as well as provide room division.

Storage - not just places to store paper.....

Curved units provide interesting division between working groups and define corridor areas

Space division

Personal storage

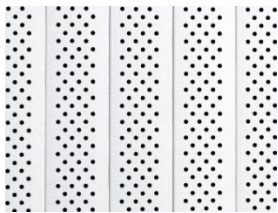

Lockers provide secure storage for nomadic workers and visitors to workspaces and continue to replace pedestals as workstations become free address.

Storage - not just places to store paper.....

Reducing noise

Using the latest technologies in sound absorption, incorporated within the design of very functional storage, noise can be reduced in your office and increase the storage capacity

Recycling

Whether it's confidential waste for shredding or receptacles for cans, glass and plastic we can tailor standard cabinets to integrate with your interior and solve the problem of recycling
